

BCIFF INTERVIEW WITH RICARDO SANTIAGO SOTO RE INTELLIGENCE COMMUNITY ABUSES DOCUMENTARY

Ricardo Santiago Soto is a film actor, photographer and writer. Mr. Soto is a fine artist having won (10) fine art, (7) photography, (10) journalism, (19) screenwriting, and (2) film production award(s). He won a talent show competition in elementary school and has trained in vocal techniques, as well as acting at Santa Barbara City College (SBCC). He was cast in a film in his first ever audition. Ricardo's film acting credits include 'Where Dreams Rest' (2018), and 'Miranda's Marionettes' (2019). He received an associate of arts in liberal arts and sciences with an emphasis in behavioural and social sciences (AA) degree from SBCC '15. In addition, he received his bachelors of science in business administration (BSBA) degree from Capella University '12. Also, Ricardo received his master of business administration (MBA) in finance degree from Aspen University '20. Mr. Soto is a lifetime member of the Golden Key International Honour Society. Ricardo is a member of Broadcast Music, Inc. (BMI), International Documentary Association (IDA), International Screenwriters' Association (ISA), Los Angeles Centre of Photography, Hispanic Public Relations Association (HPRA), and National Association of Hispanic Journalists (NAHJ). He runs PublicistWire, which is a division of MultiTalent Management Incorporated. Rick was appointed into Lexington Who's Who (2001), Empire Who's Who (2004 / 2005), and Cambridge Who's Who (2008).

Today, we are lucky to have him with us. A round of applause for the brave attempt before we begin the questionnaire.

1) What are these Intelligence Community Abuses?

It begins with 9/11 and the legislation that was enacted by Congress as my business dealings initially focused on web design / search engine optimization (SEO) shortly thereafter only to lose internet traffic causing me to lose clients costing \$1,000 a month in residual income. Those that hide behind the internet are the same ones who created the internet being the military. Military intelligence has been hacking my dial-up internet / wifi network, computer RAM performance (at this very moment), watching me via satellite, hiding in my bedroom walls signified by cable taps, making me hear voices with their intelligence technology, controlling car traffic, making me hear vehicle engines within my bedroom even though walls separate me and the road outside, frying my brain via intelligence technology, making my muscles ache and hurt in order to control me to take my medication even if my stomach is full, controlling street lights where car traffic is about to cross and then making the lights turn red trying to cause an accident, making my cat have pain making her cry until she is dead, making my mom sneeze or cough at certain times, making phone calls go silent with no one saying anything--such as forwarded calls for months not leaving a voicemail after 2

seconds all because I created a voicemail greeting with a United Kingdom woman, making me receive social media posts and emails that have been curated by the intelligence community in order to create their own culture or attempt to brainwash me, not allowing Norton Internet Security LiveUpdate to update properly or make the updates take a long time to install, not having Windows Updates update automatically or make me try to install repeatedly, delaying auto updates by 2 weeks in order to make it look like a hacker has certain rights to hack or steal trade secrets, performing intelligence community processes by intelligence community members who are watching me through my eyes in order to surveillance / analyze, collect, and create operations against me, basically trying to kill me, break apart my social/family life, trying to set me up with women who are out to make complaints against me, irritate me, make my car swerve when I drive on the freeway by controlling the wires that connect to my tires, making me smell human bad breathe when no one is around, attack me at work by rushing pee to my penis so I have to go to the restroom every 30 minutes throughout my shift, human intelligence that gets in my way or makes complaints on me on purpose trying to create a terrorist bomber or mobster by manufacturing me, all sorts of things—I journalize about their daily abuse occurrences on my blog titled, 'Intelligence Mobsters' located at <http://www.intelligencemobsters.com>

2) Do you believe all these abuses are true to its origin or some of it can be falsified by the criminalities mind of the general society?

I believe people are followers and are basically following legislation that was created by the stroke of a pen or what someone is telling them to do out in society or behind closed doors with me. I believe there are some people who really believe in their history education of races against each other and that politics should be enacted on all costs in order to remove a human rights activist being me. I believe there really is signals and human intelligence being performed. I believe the intelligence community are out to remove cultural icons in society, because they have too much cultural power or political power. I believe there are people who are use to lying and that this country believes in the separation of Church versus State and that is the problem. I believe if people did not lie they would not perform human or signals intelligence or try to remove human rights activists falling under Thou Shall Not Kill. I believe these intelligence community members are living by a lie and continue to act out that lie no matter the consequences. When I use to hear voices aggressively I would hear them operate, basically hiding behind anything and blaming that thing they are hiding behind. I basically have to take a multivitamin after I eat; otherwise, the intelligence community makes my muscles ache, so they are hiding behind my age even though doctors say I am healthy, it doesn't matter to the intelligence community if they want me to take a vitamin I have to take it to make my muscles feel normal. I have to eat a balanced diet, brush my teeth everyday, exercise, shower, basic things. I have to live a normal life, the intelligence community won't let me focus on business anymore, I have to sit around and do nothing now. I have to eat bananas after I eat, so when I go to the supermarket there are

people who get in my way—can you believe it? These people wait for me to enter the supermarket and then carry out their operations just to get in my way—it has been going on for years. Now, Buellton, California is on the map, because some bad actors (human intelligence) decided to get in my way—it is so stupid.

3) If you were the victim, I believe you are just like many of us, what would be your precautions knowing this can lead to social isolation at times?

I am alone. The intelligence community has broken up my social life at any chance they get to break apart communications with women or acquaintances or friends. I don't mind, I am somewhat of a cowboy or independent often seeing myself as a leader. I sit in my room and create art—I turn lemons into lemonade. Yet, the intelligence community see this as an opportunity to label me with a disability or be handicap or as a Lone Wolf Terrorist. I have written to the Central Intelligence Community (CIA) and was written back that they have no data on me nor on any watchlists. These intelligence community members who are performing all these operations are trying to label me as a Lone Wolf Terrorist, because they see me as a threat to turn the tide against the intelligence community—to be better people. I would say a precaution is to create a team. You have to create a team in order to compete against anyone, especially the intelligence community. I am a private person; yet, the intelligence community is forcing me to speak out, create art, create awareness, which will educate people, build support, and hopefully receive donations or ticket sales that will help build a team. The more people that I tell, the more awareness that is created—the weaker those that are watching me become—I can hear their voices become lower auditorily, I can feel their attacks get weaker. I just have a good heart, I don't want to destroy them or have them get killed, but I am afraid there will be people within their organization that will take them out. I just want them to become light—I want darkness to become light.

4) In your opinion, what should be the major steps taken by the government to avoid these allegations?

I don't believe there should be a separation of Church and State. I believe in the Ten Commandments. I was an altar boy as a kid. I believe the intelligence community should abide by the Ten Commandments. This means the intelligence community should not lie, nor kill. I also believe the government should not give the intelligence community immunity or total power. I am surprised no one is running to my aid, no one asks me if I need any support—it is as if society is use to this—it is ridiculous. The government should get rid of the Second Amendment—why are we promoting guns? It seems when the republicans are in power they promote dogs and guns—you call this culture? Dogs are wild beasts that kill cats and can maul humans. The government should strip away any security clearances from any intelligence community members who abuse their power on journalists or human rights

activists or anyone, while giving them a felony. I also believe district attorneys should not give police immunity for killing citizens—they should make the arrest, not kill.

5) Do you think stating facts against the government risks the life of a journalist?

Yes. The intelligence community like to hide in shadows or secrecy. This all became extremely aggressive the day after I spoke out at the Santa Maria City Council after my cousin Albert Covarrubias, Jr was shot and killed by police. My cousin was a police officer for the department and was framed for raping a police explorer. The police explorer was an informant who set-up my cousin. I stated that the police chief should be fired, which was televised and the next day my laptop computer was shut down or turned black. The intelligence community has been living a life of silencing me ever since by trying to make it appear that I have schizophrenia in order to ruin my reputation, make me hear voices, make me mistype on my laptop, making future laptops not work well or automatically turn off and on, as well as, all the incidents I journalize on my blog. The intelligence community set my cousin up and are trying to kill me for telling people or trying to inform the public that he is innocent. I don't see how the right to bear arms supersedes the right to free press. One kills, while the other presses those that kill against the wall not to kill. I will take Thou Shall Not Kill anyday.

6) Intruding in the private sphere has been the top notched allegation in recent times against the Intelligence Community. What do you think of the reason behind this? Insecurity or just a common security purpose?

Control. I interviewed a professor who studies the intelligence community and he said that the intelligence community likes to control society, because the system works. Basically, what he is saying is that the intelligence community feel the need to control people within this system that works and anyone who pushes the boundaries is seen as a threat—even if you are creative! Creative people like to push the boundaries, because they are creative. I don't think the intelligence community truly understands people thoroughly, they just like to control people based on what is written for them to do. Therefore, what was given to them in writing can be re-written or taken away by the stroke of the pen. The intelligence community's power is limited—they have weaknesses. The intelligence community has shown me their weaknesses and I am exposing them along with their abuses of power within a web series called, 'Intelligence Mobsters.'

7) How did you categorise your questionnaire?

I just based the questions on what first popped into my mind as to what abuses were happening to me.

8) What was your purpose regarding the questionnaire?

The purpose of the interview was to bring awareness to the public, because I receive no sympathy from anyone I meet in public nor online. So, I feel my social media posts are being blocked from the intelligence community. I figured a documentary would go over the heads of the internet and educate the public. I am also planning to create DVDs and ship them to members of Congress, as well as, offer them free to libraries. This is not about feeling sorry for me, but rather feeling the pulse of the public on how they feel towards the intelligence community.

9) Do you feel safe every time you go through your camera for your own personal reasons?

Yes. However, I do not believe I have any privacy—I always feel watched and plotted against, but I am use to it. I think this is what I signed up to, being persecuted for being Baptized, making my First Communion, and Confirmation—to serve God.

10) What would be your ways to control this situation caused by the Intelligence Community?

I believe we should have White Hats versus Black Hats just like in Spy versus Spy comic strip. I am somewhat serious in that these intelligence mobsters consist of a team who hide in technology. The Black Hat team consists of analysts, collectors, and operators. The analysts watch brain images and see through your eyes, while the collectors collect those thoughts. The operators strategize or plot against those they target. I wrote a paper, which was published titled 'Mitigating Intelligence Community Abuses' found @ <https://osf.io/preprints/socarxiv/v4tc6/> that details my plan to fight against this Black Hat team with our own White Hat team consisting of the same analysts, collectors, and operators, but with a prosecuting attorney to seek criminal charges. The Black Hat team would receive felonies, and have their security clearance taken away. This would all be accomplished through a reporting system similar to the one I created labelled 'Reporting of Intelligence Community Abuses' found @ <http://www.globalclosers.net/machform/view.php?id=14351>
